**Fiscal Impact:** 138,975.00  
**Funding Source:** Lease Purchase  
**Account #:** \_\_\_\_\_  
**Budget Opening Required:** ☐

**ISSUE:**

A resolution authorizing the purchase of an additional ambulance unit from Frazer Built, Inc. for use by the Fire Department.

**SYNOPSIS:**

We are currently facing times when our ambulances are all out on calls and there is a need for an additional transport unit. As the service grows we will continue to evaluate the needs of the transport portion of the emergency medical services.

**BACKGROUND:**

This ambulance will function as the sixth ambulance for our emergency medical services. During the past year we have found there are numerous peak times in which we will need to place the sixth ambulance into service. The proposed ambulance is also going to be the first bariatric ambulance for our fleet. This will give us the ability to provide services that we have not had. It is recommended that the ambulance be purchased from Frazer Built, Inc. since it is the current manufacturer of existing equipment used by the Fire Department.

**RECOMMENDATION:**

The West Valley City Fire Department recommends the purchase of the new Ambulance from Frazer Built Inc. in the amount of 138,975.00.
